

NK Securities Research

Software Developer (Platform/AI) Internship (6 Months)

Location: Gurugram

NK Securities Research is a leading financial firm that leverages cutting edge technology and sophisticated algorithms to trade the financial markets. Founded in 2011, we have gained invaluable experience in the field of High Frequency Trading across different asset classes.

Key Responsibilities:

Platform Team

1. Build and improve internal web applications used by Quant, Infrastructure, and Operations teams, including tools for analyzing large datasets and live data streams.
2. Develop reliable, well-tested Python code that automates trading-related processes Build AI-powered tools to improve efficiency and support trading workflows.
3. Write scripts to optimize and eliminate repetitive operational tasks.
4. Collaborate with senior engineers to understand requirements and deliver robust solutions.
5. Document workflows, scripts, and key learnings for future reference.

AI Team

1. Implement scalable AI tools and workflows that enhance engineering, research, and business processes across the firm.
2. Build observability, evaluation, and interpretability systems for AI-powered applications, including monitoring model behavior, quality, latency, and reliability.
3. Develop safe and secure integrations between AI models and internal systems, APIs, databases, and knowledge sources.
4. Design guardrails, access controls, and validation mechanisms to ensure responsible use of AI within enterprise environments.
5. Work closely with engineering, research, security, and product teams to identify high-impact AI use cases and turn them into production-ready solutions.
6. Continuously evaluate emerging AI models, frameworks, and tooling to improve internal AI capabilities.

Preferred Qualifications:

1. Strong foundation in Python (Django, Flask or Fast API), experience building Python-based APIs
2. Good understanding of asynchronous programming concepts and implementation in Python
3. Experience with front-end technologies like [React.js](#) is a plus, basic HTML/CSS/JS
4. Good understanding of Databases and caching techniques
5. Familiarity with Linux/Unix environments
6. **[AI Team]** Experience with developing AI agents and theoretical understanding of AI concepts
7. Eagerness to learn, take ownership, and work in a collaborative environment
8. Strong problem-solving skills and a proactive mindset

What You'll Gain:

1. Real-world exposure to live trading and quantitative analysis processes
2. Mentorship from experienced developers and engineers
3. Opportunity to contribute to high-impact projects used in live trading environments

We are a fast-growing organization where there is no ceiling on the career trajectory of an individual. The startup style governance of the firm enables the newest employees to work with industry veterans. Outstanding performers will be granted a Pre-Placement Offer.

Who Can Apply (Eligibility Criteria)

Branch: Computer Science and allied (CSE-umbrella) & Circuital branches, including:

- Computer Science & Engineering (CSE) / Computer Engineering
- Information Technology (IT)
- Software Engineering
- Artificial Intelligence / AI & Machine Learning / AI & Data Science
- Data Science & Engineering
- Mathematics & Computing / Computational Engineering
- Electronics & Communication Engineering (ECE) / Electronics Engineering
- Electrical Engineering (EE) / Electrical & Electronics Engineering (EEE)
- Instrumentation & Control / Electronics & Instrumentation Engineering

Academics: CGPA of 8 or above (on a 10-point scale).

Backlogs: No active backlogs at the time of application.

Availability: Able to commit to a full-time, in-office internship of 6 months in Gurugram.

Stipend: ₹2,50,000 per month

Compensation -

CTC: ₹46 LPA + Non-cash Benefits worth ₹6 LPA*

Fixed Base Salary – ₹36 LPA | Annual Bonus – ₹10 LPA | Sign-on Bonus (one-time) – ₹2 Lakhs

Non cash Benefits:

- a. Catered breakfast and lunch at the office
- a. Fully stocked pantry
- b. Monthly team dinners and fun social events
